

Talmandor's Bounty Farmer's Almanac

This book details a daily account of weather and tides. The almanac begins on Wealday, Erastus 4th, 4717 and continues through Fireday, Kuthona 2, stopping abruptly. It is not certain who made the entries. The handwriting is crabbed and untidy in places, but the ink is never smeared or spotty. None of the other documents found in Talmandor's Bounty match the penmanship.

An excerpt of a tide-chart is as follows:

A Tide Chart for Bountiful Bay

Rova 14 – Somal New

- Sunrise: 6 bells, 12 mins.
- 8 bells: 5 ft. 6 in.
- 10 bells: 2 ft. 3 in.

Another section of the almanac includes a weather diary. An excerpt is as follows:

Weather in Bountiful Bay

Arodus 4717 AR

- 5th: Fine.
- 6th: Rain, a strong wind all night and the next day dry and fine till the 15th, when there was no rain but it was misty and dull; the next day there was very clear weather.
- 18th: Rain after midday, but before it was dull though dry.
- 19th: It was cloudy and hot all day.
- 20th: It began to rain gently at dusk and in the night, but afterwards it was dry though cloudy and warm, so that the stars did not appear either by day or by night until the night of the 27th, when the major stars appeared.
- 30th: Rain in the daytime and rain the following night. Heat continues, mercilessly.
